# VAM Will Take Part in the SPE's Annual Technical Conference and Exhibition (ATCE) 2006 in San Antonio 24<sup>th</sup>-27<sup>th</sup> September 2006

Visit us at SPE 2006, Booth 2101, to learn how VAM can guarantee you the right connection.

SPE's Annual Technical Conference and Exhibition (ATCE) is perhaps the most significant annual gathering of petroleum professionals anywhere in the world.

Through the presentation of some 350 highly relevant and timely technical papers, ATCE delivers the technology that fuels today's upstream oil and gas industry. The latest display of equipment and services demonstrated and explained by knowledgeable company representatives make ATCE the industry's most comprehensive single-point marketplace.

Awards presentations recognizing outstanding contributors to the technology and profession, coupled with continuing education courses, and a number of social functions make ATCE a must for every oil and gas professional

**Smooth Operators.**  
**VAM Sales Engineers and the VAM® SLII-II Slimline Integral Connection.**

The VAM® SLII-II provides great downhole performance with outstanding tension and compression ratings.

VAM premium connections are the standard in the oil and gas industry, providing an excellent combination of leading performance, reliability, economy and "best-in-class" service.

With more than 50 sales engineers and 1,000 field service personnel worldwide, VAM provides the right technical support to ensure that even the most difficult well gets made in one.

For a smooth connection, the VAM SLII-II is ideal for production and intermittent casing, liner and tieback applications. For smooth operations, call a VAM sales engineer or field service technician today.
